

Girls in Math & Science

*Are you good in math and science?
Are you unsure of your post high school options?*

Girls, do you know:

- How much engineers make?
- What kind of work computer science majors do?
- What it takes to be admitted into an architecture program?
- What kinds of scholarships are available in these fields?

Mrs. Herbener, college counselor, will be taking interested girls on field trips to explore your options. Last year, we visited the UNL Engineering Departments. Our next visit will be to the Peter Kiewit Institute on the UNO campus on October 22nd to learn more about information technology.

If you're interested, return the bottom portion of this form to the Career Ed Center **by October 10**. See Mrs. Herbener if you have questions.

Student _____

My daughter has permission to attend the **Girls in Math & Science** field trip to the Peter Kiewit Institute on _____.
